PERSONAL STATEMENT / COVER LETTER

I am a qualified and professional graphic designer with almost 2 years of agency experience in graphic design, and 4+ years experience in freelancing, content creation, and additional relevant work (refer to experience).

If I had to describe myself in 3 words, it would be ambitious, disciplined, and a risk-taker, which can clearly be shown by my willingness to break my own rules and use 4 words instead of 3.

My ambitions include wanting to travel abroad and experience all the various cultures, as well as showcasing my passion for art, design, and content creation.

I have always been extremely disciplined with my health and fitness, and living a positive, forward-moving lifestyle. I am a goal setter and will often stop at nothing to achieve these goals. One of my largest achievements was becoming head girl of my high school which also taught me leadership, time management, and administration skills.

I find adventure in seeking discomfort, and am always surprised at the things I learn about myself when taking risks. I am most passionate about art & design, but am also deeply compassionate about animals, nature, and my family. I love making people laugh and thrive in any environment that requires me to do team work or even lead a team. I am a flexible, adaptable person who can also work alone in an office or from home, but be careful - because I do love a good chat!

The final phrase I would use to describe myself, is someone who simply loves life. I often find joy in the small things, like having a glass of wine while watching the sunset. I always try and look at life with a positive perspective, and have faith that no matter how bad things are, they will ALWAYS get better!
